

# SCIENCE IN THE CINEMA

with

## “Outbreak”

As part of ASMR Medical Research Week®

This award winning 1995 movie details the challenges faced by a group of expert Research Scientists as they struggle to identify and ultimately deal with the release of a deadly virus in small Californian town. Although a Hollywood film, “Outbreak” emphasizes the real risks associated with transmission of infectious diseases in today’s global society and we hope will set the scene for a lively discussion between students and expert panelists on medical research themes, including infectious disease, immunology, vaccine development and treatment strategies. Our expert guest panelists include some of WA’s top scientists.

Venue: Horizon, The Planetarium, Scitech, City West, Sutherland St, West Perth  
Date: Thursday 10<sup>th</sup> June 2010  
Time: 4:30 pm – meet and greet
